

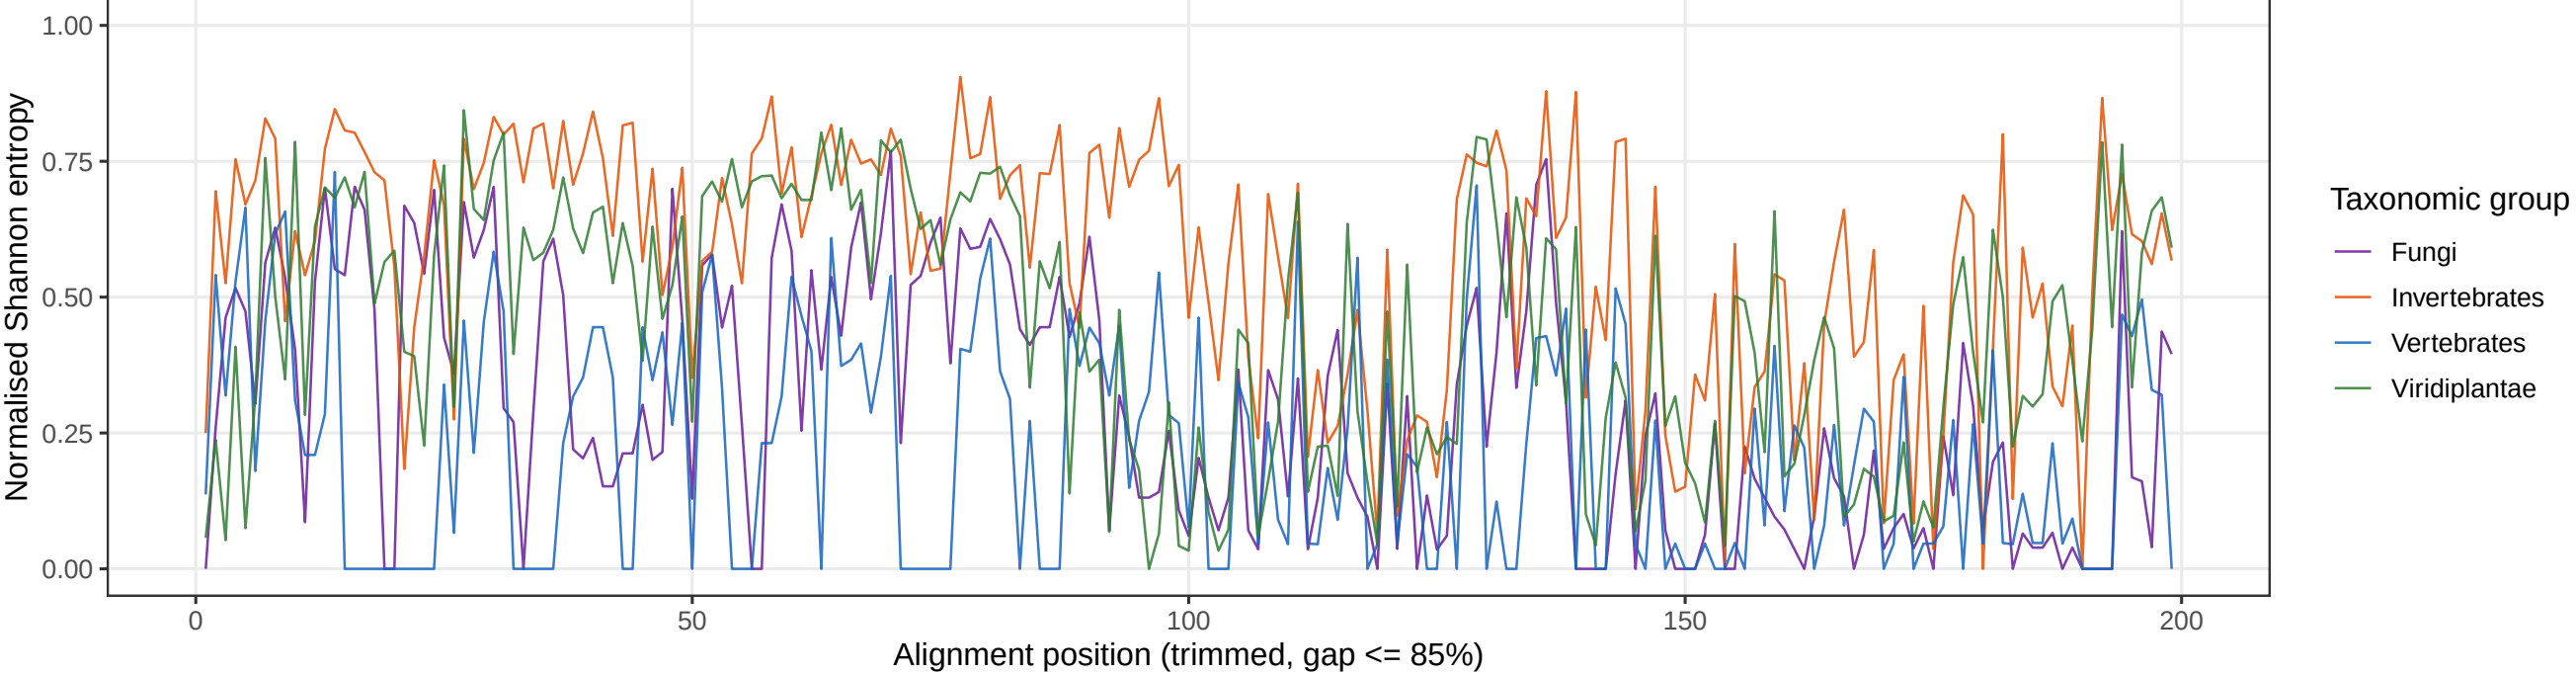

Figure 1 C+D ... CENP-A/CENH3 entropy analysis (325-sp)

C: per-group positional entropy. D: CENP-A vs H3 split entropy.

CENP-A/CENH3 positional entropy by taxonomic group (325-sp)

428 CenPA sequences; 199 trimmed alignment positions

CENP-A vs H3 split entropy ... bnai tree (325-sp)

Per-group masking: NaN where group gap > 85% (CENPA: 0 masked pos; H3: 11 masked pos). Top dark dots = top 10% CENP-A entropy positions.
