

Supplementary Figure – Calibration validation: 325–species DToL chronogram

A

Calibration nodes: TimeTree range vs calibrated age (62 nodes)

Red diamond = TimeTree median | red line = TimeTree range (constraint for most nodes) | black circle = calibrated age | y labels by clade

B

Node-age concordance with TimeTree

n = 213 nodes / 210 shared taxa. Best = correlated $\lambda=0.1$ (circled). Strict clock $r=0.969$ / $R^2=0.939$ (no λ); root node age comparison = 1:1 line

C

Best fit: correlated ($\lambda = 0.1$)

213 nodes age comparison = 1:1 line
